## GPS Vehicle Monitoring

**USB Flash Drive**  
Removing Data to PC

## GuardMagic mTF1 Vehicle GPS & Fuel Data Logger

**GuardMagic mTF1** - vehicle "GPS & Fuel Data Logger" with USB port for USB Flash Drive connection.

**GuardMagic mTF1** is intended for construction transport control and fuel monitoring system.

**GuardMagic mTF1** can be applied in any type of motor transport: truck, car and bus, road and building machinery, agriculture technic, tractor and bulldozer, railway locomotive, also can be applied on a river transport.

**GuardMagic mTF1** in fully automatic mode collect data about vehicle movement (GPS track-coordinate, speed), fuel level in fuel tanks, condition of external logical sensors (circuits) and stores it in its internal memory. Removing stored data to PC is carried out by standard USB Flash Drive.

In additional **GuardMagic mTF1** allow preventing the non authorized use of transport or special technics (and can carry out the guard function).

### typical features:

- monitoring up to TWO fuel tanks;
- driver identification function;
- immobilization function;
- removing data to PC by standard USB Flash Drive;
- connection to reserve battery.

### main data:

- records quantity -240 Thousands;
- power source - 9...32 V;
- fuel sensor - **GuardMagic FLPa** or vehicle regular with analog output;
- size - 120(150)x85x22 mm;
- weight, main unit - 240gr.
